	Craigmore are one of the largest distributors of 3M welding equipment and personal protective equipment in the UK and Ireland. Our 3M range includes Welding Helmets, Protective Clothing, Respiratory Protection, Abrasives and more.	1-12		Draper Tools is considered as one of the most omnipresent tool brands in the sector and provides an exhaustive catalogue of hand, power and air tools.	43-46
	Speedglas has been associated with high-performance welding safety equipment for over 40 years. The Speedglas brand is renowned globally for state-of-the-art technology, bringing welders the best in optics, comfort, productivity, lighter weight, and much more.	13-18		Makita is regarded by many as the foremost manufacturer of power tools in the world. With 100 years' experience, Makita products are lauded the world over for both their performance and quality.	47-48
	As the world's largest manufacturer of cleaning machines, Kärcher understand that each customer has their own unique cleaning goals. Kärcher machines set a benchmark in providing deep cleaning for the task at hand, providing outstanding results and delivering time, effort and resource savings.	19-24		Sealey is known internationally as a leading brand & supplier of professional tools and workshop equipment. With over 9,500 products designed for use in the trade, Sealey are your one shop stop for the tools and equipment that you need.	49-54
	AVA of Norway are passionate about their products and want them to last. Launching a thorough service program and providing up to 20 year warranty is a part of their contribution to long lasting products.	25-26		Starrett supply high quality measuring & cutting solutions developed over centuries of expertise, global manufacturing and a new dynamism to deliver on time, in full, in a fast-paced world.	55-56
	For over 50 years, SIP Industrial has been a flagship supplier of high-quality equipment and machinery to the ever-growing engineering, construction, automotive & agricultural marketplaces.	27-33		Wera love design & innovation, something that can be clearly seen in their 3,000+ product range. Wera are never content with existing standards and believe that their tools make life simpler, safer and 'full of joy' for their users.	57
	Unior ranks among the world's major representatives of metal-processing industry. The company develops its success with excellent synergies and three production segments (Hand tools, Forging and Sinter parts and Special machines)	34		Osborn provides one of the largest ranges of engineering cutting tools in the UK. They specialise in a variety of products including drill bits, reamers, counterbores, countersinks and threading tools	58
	Jacobs chucks, high precision tool holders, arbors, and related accessories have made Jacobs the leading brand of precision tool holding and work holding devices in the world.	35		A global player in the design and manufacture of welding products, Parweld offer one of the World's most comprehensive range of MIG, TIG and plasma torches, alongside an ever-increasing range of welding machines, PPE and other complementary products.	59-60
	From cordless solutions to customisable janitorial systems and advanced floor-care equipment with on-hand training, Numatic delivers professional, practical and reliable equipment, designed, engineered and made in the UK.	36			
	Nielsen chemicals specialise in cleaning products for the Automotive Industry; with a brand portfolio encompassing a complete range of cleaning, valeting and maintenance. Continuous research and development ensures that Nielsen stays ahead by utilising the latest technology to meet the ever-growing needs of the diverse transportation industry.	37-38			
	TYROLIT is one of the world's leading manufacturers of grinding, cutting, drilling and dressing tools as well as machines for the construction industry.	39-40			
	DeWalt Industrial Tool Company is an American worldwide manufacturer of power tools and hand tools for the construction, manufacturing and woodworking industries, as well as home craftspeople.	41-42			

A WORD FROM OUR MANAGING DIRECTOR

For nearly 30 years, **Craigmore** has supplied customers both locally and internationally with some of the best Cleaning, Welding, Personal Protective Equipment (PPE) and Workshop Equipment that the market has to offer. From humble beginnings at our long-standing headquarters based in Craigavon since 1989, our team has grown considerably, with now over 30 loyal and long serving staff members across 2 sites, who have been recognised for their expertise and commitment to customer care.

In April 2018 we opened our second Karcher Center on the Boucher Road in Belfast. Since then, we have enjoyed continued success year-on-year, with more local businesses relying on us to advise and deliver on their specific needs and requirements. We are proud to say that our Belfast store is now recognised as one of the largest Karcher Centers in the UK and Europe, and has been regarded as 'setting the standard' for the Karcher network in Europe.

More recently, we have extended our "bricks and mortar" sales model onto e-commerce, with the launch of our website craigmoreonline.co.uk - which I am pleased to say has been a resounding success! The growth of our UK website has encouraged further development of our Irish (.ie), Australian (.com.au) and American (.com) websites, allowing us to expand our online presence across the globe.

To all our existing customers, I want to personally thank you for your continued business and support. I hope that from our pre-sales advice to after sales support, you have felt both valued as a customer and confident in the products and services we have provided. I am extremely proud to be part of a company which is firmly focused on building a great future, founded on our successful past, and as we move forward we have some exciting plans ahead, all of which will be revealed in due course!

I trust that this catalogue provides some valuable insight into the impressive range of products and services Craigmore is able to offer. Our team remains committed, pro-active and passionate in sourcing only the best and most trusted brands, providing you with a wide variety of top class products at the most competitive prices.

Geoff Baird

WHY CHOOSE CRAIGMORE?

✓ **30+ years industry experience**

✓ **Expert product knowledge**

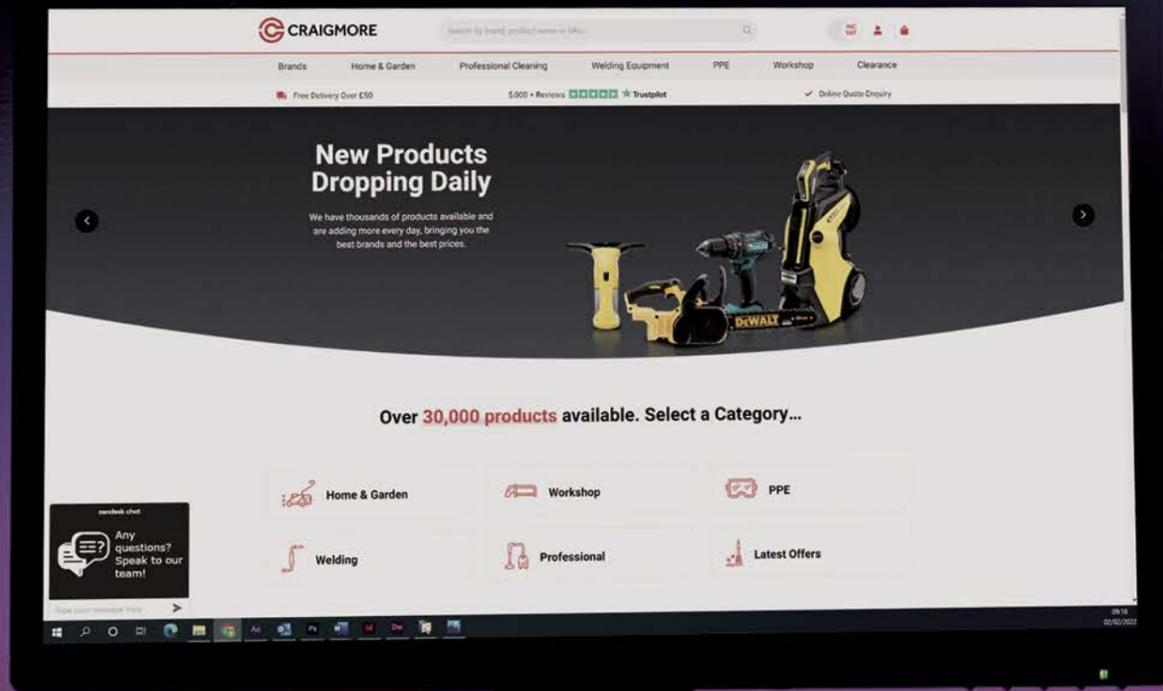

✓ **Experts available to talk you through your needs to find the best product for you**

✓ **Largest Karcher Center and Karcher service center in Northern Ireland and one of the largest in the UK**

✓ **BOC gas agents**

✓ **Unrivalled after sales service**

Craigmore Online **B2B** E-commerce Coming Soon

...**Simple online ordering,**
at the click of a button

for more information or to sign up, please visit
craigmoreonline.co.uk/b2b

Craigmore are excited to announce the upcoming launch of our new **Business to Business (B2B)** website!

Whilst we endeavour to provide quality products and services across the globe, we wanted to focus specifically on our **local** business account customers, with an aim to create an easy online user experience for ordering and browsing our wide range of products.

Our upcoming B2B website will make ordering for your business quick and simple, and ensure that products and offers are tailored to your specific needs and requirements.

Benefits of Craigmore **B2B**

Easy ordering at the click of a button

We want to make ordering simple and fast, and believe that our new B2B website will help achieve this

Exclusive offers & price negotiation

New products and offers will be targeted towards your specific business needs with a streamlined quote request system

Convenient account management

Self Service Portals will allow our B2B Customers to access invoices, order history and credit

CRAIGMORE

B2B

Dedicated to Worker Protection

3M has a long history of applying its innovative materials to the challenges of worker protection. Today, as one of the world's leading suppliers of respiratory protection, their goal is to ensure that they satisfy your needs through exceptional leadership, expertise, quality and service.

Credibility & Leadership

3M produces thousands of imaginative products, and are a leader in scores of markets, including the global respiratory protection industry. With sales in nearly 200 countries, 3M has 76,000 employees worldwide. 3M specialised distribution networks can help your workforce in the careful selection of, and training in, respiratory equipment.

Proven Solutions

Workers want respiratory protection equipment that is comfortable, lightweight and convenient. 3M delivers protection products that are high quality, high comfort, professional grade equipment, advanced over years of research and development, customer feedback, and customer success.

3M Versaflo™ Respirator Systems

Introducing a Highly Versatile Range of Respirator Systems ...

The new **3M™ Versaflo™ Respirator System** represents an enormous effort by 3M to accomplish three major goals:

- Simplify the equipment selection process
- Increase system versatility
- Improve user comfort every step of the way

Many users of half and full face-piece respirators are taking a second look at powered and supplied air systems for reasons that go beyond mere compliance.

3M™ Versaflo™ Respirator Systems are a comprehensive approach to worker protection systems based on comfortable-to-wear modules.

3M Versaflo™ Respirator Systems Benefits

Integrated Protection

Safety managers can configure modules and accessories to help protect users from a variety of combined hazards.

Flexibility

Each system has three easy-to-select modules – an air delivery unit, a headtop and a breathing tube – that can be combined into dozens of system configurations. It is the ultimate in flexibility for handling changing user environments, needs, and comfort preferences.

All-Day Comfort

With 3M Versaflo Respirator Systems, pressure on the face, breathing resistance, and heat build-up are all greatly reduced when compared to non-powered and supplied air tight-fitting facepieces, creating all-day comfort for the user.

Easier to Breathe

With 3M Versaflo Respirators, flowing air is provided to the user, reducing the additional breathing effort required for half and full facepiece respirators. This increases user comfort at all times, but is especially important during periods of strenuous labour.

New Levels of Simplicity

- Easy to select compatible modules.
- The 3M Versaflo TR-300 turbo unit is equipped with automatic flow control, low battery alarm, and low flow alarm.
- Most user interface/adjustment points highlighted in blue for convenience.
- QRS (Quick Release Swivel) breathing tubes allow fast and easy connection.
- Easily removable parts allow simple cleaning, maintenance and replacement.
- Many common parts across the range.
- Accessories and options to suit different applications.

New Levels of Comfort

- Lightweight, compact and well-balanced designs.
- Breathable air is provided to the wearer; reducing the additional breathing effort required.
- Adjustable airflow feature distributes airflow where the user wants.
- Quiet system with reduced motor noise and air whistling.
- Soft face seals and inner collars.
- Multiple size adjustment options allow for a comfortable fit.
- Provides excellent peripheral and downward vision.

3M

3M Disposable Respirators can be used in a wide range of environments to provide the right protection against a range of hazards

Metalworking

Construction

Pharma

Woodworking

Protection that works as hard as you do.

3M offers a wide selection of CE approved disposable respirators, also known as disposable masks or filtering facepiece respirators to help protect against particulates. With models available in **FFP1**, **FFP2** and **FFP3**, you can be sure to find the right disposable respirator for your needs.

Innovative Technologies

3M disposable respirators have a legacy of quality with reputable filter media technologies that include electrostatic charge and nuisance odour protection.

Built for Comfort

Faces come in all shapes and sizes. 3M prioritises fit and can help workplaces achieve comfort and compliance. 3M disposable respirators feature adjustable nose clips, a variety of head strap types and some models feature the innovative 3M Cool Flow valve designed to provide greater comfort.

Stewards of Quality

3M disposable respirators are tested and approved by regulatory approval bodies throughout the globe. In a world where counterfeits abound, put your trust in a manufacturer with over 40 years of experience in designing and producing quality disposable respirators.

3M

3M

PELTOR™

Peltor™ communication equipment as well as hearing, head & face protection products for noisy and hazardous environments are renowned world leaders. With more than 50 years of experience, the Peltor™ brand promises superior quality communication solutions that provide an optimal balance of comfort and protection.

PELTOR™ EAR PROTECTION

High Attenuation Headset

Model: Standard Flex headset

With its carefully designed microphone/speaker system and excellent attenuation, the 3M Peltor Headset range offers acoustic performance providing communication in very high noise environments. Peltor's proven and durable designs ensure high comfort levels, allowing long term use under very tough conditions

Tactical Platform

Model: ProTac, WS ProTac, Tactical XP, WS Tactical XP, WS Workstyle

3M Peltor Tactical products are invaluable tools for people who are subjected to impulse noises. The active-volume function lets you hear ambient noises, such as conversations, machine sounds, warning signals etc. Soft sounds are amplified, so you hear them even better than you would without hearing protectors. These products are well-suited and often used by militaries, hunters & shooters as well as industrial users.

FM/AM Radio Workstyle Platform

Model: FM-Radio, Radio XP, Alert, Alert Flex Headset, WS™ Alert

With one of the products from the Peltor Workstyle Solutions range, you can both protect your hearing effectively and at the same time enjoy listening to the radio while working. Some models can even be connected to a telephone or communication radio, making you accessible wherever you are.

Lite-com Platform

Model: Lite-Com™ Basic, WS™ Lite-Com™

3M Peltor Lite-Com solutions is a range of products with a built-in communication radio in the cup. The system provides effective and effortless short-range two-way communication.

X-Series

Model: X1, X2, X3, X4, X5

Built on the three pillars of Design, Comfort and Protection, the 3M Peltor X Series meets the needs of an extensive range of industrial noise applications. In addition to exceptional comfort and modern styling, the range is based on ground breaking attenuation techniques for superior attenuation with a streamlined design.

Peltor™ Uvicator™ Technology
for safer working conditions

With the Peltor™ Uvicator™ Technology there is now an accurate and easy way to assess integrity and safety of the helmet related to UV-radiation without the added cost of unnecessary replacement by simply looking for colour change.

Measures exposure to UV radiation

Technically calibrated and tested

Works globally in most environments

Tells you when to replace your helmet

Ventilation

For comfort, good ventilation is a must, particularly in warm environments. The Peltor™ G2000 Solaris™ Helmet allows free airflow between the helmet and its harness. Combined with ventilation inlet in the top of the helmet, this helps to increase wearer's acceptance

Peltor™ Uvicator™ Technology

The disc tells you when it's time to replace your helmet

Neck Protection

Extended edge on the back of the helmet provides extra protection for the sensitive neck area

Headband

This important feature determines how steadily the helmet sits on the head. Easy to adjust

Optional space for customised print

A flat surface for printing a logotype or brand name

Sweatband

Easy to replace for highest comfort and hygiene. Also available in soft leather

Attachment for accessories

An adjustable snap attachment in the balance point of the helmet to allow simple attachment of accessories, such as muffs, headsets and visors

Optimal profile for ear muffs

The Peltor™ G2000 Solaris™ Helmet features a special profile design to enable helmet mounted ear muffs to achieve optimal fit and maximum adjustability for individual needs

3M™ Industrial Helmet Combination

Di-electric combination specially designed for work in electrical environments

3M™ Integrated Eyewear

Designed to be used with 3M™ Helmets. The design allows the glasses to slide easily between the helmet shell and lining. Available in clear, yellow, grey

3M™ Helmet Accessories

A wide range of accessories are available, including sweatbands, chin straps, rain protection, etc...

Available in various colours with ratchet or pin-lock suspension

Peltor™ Multisystem

The Peltor™ Multisystem provides a convenient, comfortable and versatile solution to wearers who require both face and hearing protection. It has been specifically designed to be used with our Peltor™ Passive and Communication Earmuffs to ensure excellent compatibility and maximum convenience.

Unique forehead shield

Extends well over the forehead and reduces the risk of foreign particles penetrating from above

Shade from the peak

Improves visibility and reduces the likelihood of rainwater or dirt sticking to the visor

Effective protection

The visor is angled towards the chin and is swept back towards the ears, providing maximum face protection

Simple installation

Clips conveniently into place on the hearing protector's headband

Flip-up

A function which makes it easy to flip the visor up or down quickly and simply

High Comfort

Peltor™ Hearing Protectors feature soft, comfortable sealing cups and distinct band design which increases wearer acceptability

Peltor's product offering also includes a complete range of mesh and clear visors to be used in combination with Peltor™ Safety Helmets.

CUBITRON II

Conventional ceramic grain tends to "plow" through metal, building up heat in both the work-piece and your abrasive. This slows down your cuts and shortens disc lifespan. 3M™ Precision-Shaped Ceramic Grain uses 3M micro-replication technology to form sharp peaks that fracture continuously. This makes for a cooler, self-sharpening abrasive system that slices easily through metal.

Cuts faster

Works harder

Increases productivity

Roloc and Roloc+

3M™ Roloc™ Abrasive Discs are designed to be used on the face of the disc, while 3M™ Roloc™+ Abrasives are designed for use on work-piece edges and have a longer shaft for extra strength. Both series are available for a wide range of applications from finishing and cleaning to grinding and deburring.

Scotch-Brite™

Widely known for their ease of use, these trusted abrasives feature a non-woven web that binds synthetic fibres and abrasive particles. This unique construction resists loading and helps improve surfaces without significantly changing the shape or dimension of the work-piece.

Speedglas™
Welding Safety

Welders need durability, reliability, and safety. **Speedglas** strives to bring you the best in optics, comfort, productivity, lighter weight, and more...

When you need coverage, control, and comfort:

3M™ Speedglas™ Welding Helmet Series 9100

High-performing people need high-performing products

The 3M™ Speedglas™ Welding Helmet Series 9100 includes six welding helmet models offering many options, including flip-up welding shields, safety helmets, and respiratory systems.

Peripheral vision

The first time a welder puts on a Speedglas welding helmet with side windows you can see his startled reaction. Previously hidden peripheral hazards (beams, obstacles, other workers) are now easier to see through the two, shade 5 side filters.

Tailor to fit your personal preferences

With the 9100 headband, Speedglas have carefully avoided sensitive areas of the head while designing self-adjusting twin pads for the forehead band. By better contouring it around your head, the headband doesn't need to be overly tight to be comfortably secure.

Ergonomic fit

Adjust the shield's distance to your face. Fits head sizes S-M-L, 6.25" to 8" (50-64 cm) approx.

Stability

Ratchet for precise tightening.

Adapt to your position

Adjust the helmet tilt angle while wearing the helmet on your head.

Less pressure

Self-adjusting "twin pads" contour to your head.

Low riding comfort

Adjust the helmet's parking position (left side) and friction (right side). Further details below.

3M™ Speedglas™ Auto-Darkening Filter 9100XXi:

See your welds in a new light, with more contrast and natural-looking colours.

- Grab and go welding with Auto-ON.
- 2.8 x 4.2 in. viewing area.
- Dark shades 5, 8, and 9 through 13.
- Delay settings allow the welder to extend the dark state for when the weld pool is still cooling.
- For all 3M™ Speedglas™ Welding Helmet Series 9100.
- When used with the special 9100XXi Silver Front Panel and the Speedglas Welding Helmets 9100, 9100-Air and 9100-QR, you'll have access to the external control for both grinding and the memory modes.

3M™ Speedglas™ Auto-Darkening Filter 9100XX:

- 2.8 x 4.2 in. viewing area.
- Dark shades 5, 8, and 9 through 13.
- Any shade can be "locked-in".
- The tack welding comfort mode may help reduce eye fatigue resulting from the eye constantly adjusting to differing light levels during tack welding. Using an intermediate light state (shade 5).
- The delay function allows the welder to set the recovery delay of the welding filter from dark to light according to welding method and current.

3M™ Speedglas™ Auto-Darkening Filter 9100X:

- 2.1 x 4.2 in. viewing area.
- Dark shades 5, 8, and 9 through 13.
- Any shade can be "locked-in."
- The tack welding comfort mode may help reduce eye fatigue resulting from the eye constantly adjusting to differing light levels during tack welding. Using an intermediate light state (shade 5).
- The delay function allows the welder to set the recovery delay of the welding filter from dark to light according to welding method and current.

3M™ Speedglas™ Auto-Darkening Filter 9100V:

- 1.8 x 3.7 in. viewing area.
- Dark shades 5, 8, and 9 through 13.
- Any shade can be "locked-in."
- The tack welding comfort mode may help reduce eye fatigue resulting from the eye constantly adjusting to differing light levels during tack welding. Using an intermediate light state (shade 5).
- The delay function allows the welder to set the recovery delay of the welding filter from dark to light according to welding method and current.

3M™ Adflo™ Powered Air Respirator

Your own filtered atmosphere...mobile and adaptable

As one of the most popular respirators of its kind in the world, the 3M™ Adflo™ Powered Air Respirator is designed to provide welders a constant nominal airflow rate of 205 litres per minute, regardless of the battery's charge or the particle loading of the filter.

Better for backs

The ergonomic leather belt, shaped for maximum freedom, is extra wide around the turbo unit for additional back support.

A system for your needs

System components are designed to work securely together, combining eye, face, respiratory and—in some cases—head protection.

Move around

The slim profile of the turbo design makes it easier to go into tight spaces. The robust 3M™ Adflo™ Powered Air Respirator provides all of the features you would expect in a premium system, including easy-to-use functionality.

G5-01

Welding Helmet

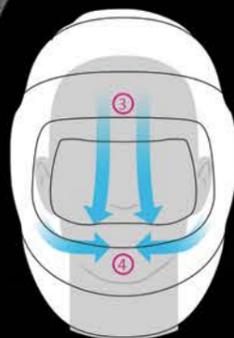

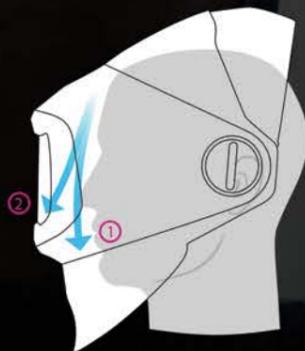

Adjust your welding helmet, not yourself.

Based on extensive input from welders working at high amperages that need to grind frequently, the 3M Speedglas Heavy-Duty Welding Helmet G5-01 is created to be adaptable to an individual's needs and situation.

- Protection against radiation, sparks and spatter, from a high-coverage welding helmet design that also offers expanded coverage options
- View your work with 3M Speedglas Natural Colour Technology – now available with variable colour option in the dark state
- Effective respiratory protection, offering the highest safety class for powered air (TH3) systems
- No compromises on comfort. Individualise your helmet comfort with different accessory configurations, while you use the new helmet controls to adjust the respiratory airflow to your preferences

Take control of your flow

For more control over your comfort, the innovative G5-01 helmet duct system lets you direct the airflow to either your face (1), your visor (2), or some combination of both.

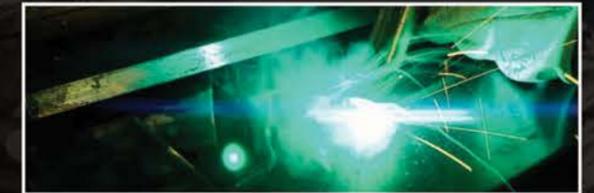

You can even adjust the amount of air coming from the top outlet (3) vs. the two side outlets (4), or choose a blend of both.

All airflow adjustments can be made while you're wearing the helmet – and continuously maintaining your eye, face and respiratory protection.

3M Speedglas Welding Filters G5-01VC and G5-01TW

There are two options of 3M Speedglas Auto Darkening Filter Series G5-01 – both offering the popular 3M Speedglas Natural Colour Technology with great clarity before, during and after welding. The G5-01 filters allow for smoother dark-light filter transition. Both G5-01 filters are also designed to minimise eye strain when switching from dark state to light state, by using an intermediate shade (5 or 7 depending on filter model).

G5-01VC Welding Filter

Which colour tone works best for you?

To provide even better view and control of your weld puddle we now introduce the 3M Speedglas Variable Colour Technology: you get to choose between natural (A), cool (B) or warm (C) tones for your dark state. You determine which colour tone provides the best viewing contrast for your welds, and the most comfort for your eyes.

G5-01TW Welding Filter

When tack welding...

Human eyes aren't designed for handling rapid transitions from dark to light to dark again – which describes tack welding perfectly! **The G5-01TW** welding filter uses an intermediate shade 5 light state to help minimise eye strain during extended tack welding applications. If an arc is not struck within 2 seconds the welding filter will switch back to its normal light state (shade 3).

Light up your workspace

A new, optional helmet-mounted task light provides hours of powerful lighting and runs off the Adflo battery pack, enabling welders to enter and work in poorly lit spaces.

- Task light specifically designed for welding
- Light weight – powered by the Adflo battery
- Positioned to cast a wide light of the workpiece
- Designed for even light distribution at normal welding distance
- Configurable light intensity

KÄRCHER**KÄRCHER CENTER**
CRAIGMORE

CLEANING WITHOUT COMPROMISE.

3

...reasons to choose **Kärcher Center Craigmore**

1

A WIDE RANGE OF PRODUCTS

With a wide range of cleaning machines, accessories and detergents, we are able to help businesses improve their cleaning efficiency, drive hygiene standards and achieve more for less. Our list of products is extensive, with our most popular lines including: Pressure Washers, Scrubber Dryers, Steam Cleaners, Vacuum Cleaners, Carpet and Upholstery Cleaners and Window Vacs. If you have a specific cleaning task to carry out, we are confident that we have the right product to get the job done!

2

A BRAND YOU CAN RELY ON

Kärcher is arguably one of the world's most recognisable brands, known for industrial and domestic cleaning solutions, as well as providing the benchmark for superior quality and innovative products. Each Kärcher machine is tried and tested throughout the manufacturing process, giving you the assurance that the product you are investing in is reliable and able to deliver outstanding results.

3

EXPERT ADVICE TO CALL UPON WHEN YOU NEED US

With nearly 30 years' experience within the industry, we are confident that our knowledge and insight will be invaluable in helping your business to achieve the highest of cleaning standards. From an initial consultation to after sales help and support, Kärcher Center Craigmore will be with you every step of the way, as we partner together to achieve the cleaning goals tailored to your specific needs.

Kärcher Center Craigmore is the only on-site Kärcher Service Center and Kärcher Repairs Center in Northern Ireland.

We are able to undertake the service of any Home and Garden or Professional Kärcher machine. As a 'Kärcher Center' Craigmore have professional and fully qualified Kärcher engineers on-site, as well as being able to attend your business to service and repair your machines.

With a wide range of cleaning machines, accessories and detergents, Kärcher Center Craigmore is able to help your business improve its cleaning efficiency, drive hygiene standards and achieve more for less.

Proud Suppliers to

Each Industry Requires Different Solutions.

Products for professional use. Finding the best solution for cleaning tasks is of growing importance for businesses of all kinds. This is why we have tailored our extensive range of products precisely to your requirements, reducing time, costs and resource consumption without compromising performance. We understand the demands of your business, whatever market sector you operate in.

AGRICULTURE

Innovative Kärcher cleaning appliances and cleaning concepts that help you master the diverse requirements of the agricultural industry.

AUTOMOTIVE

Kärcher offers cleaning concepts that are tailored to the specific requirements of car dealerships, workshops and service stations.

CONSTRUCTION

Professional machines that are a match for the wide range of cleaning challenges in the building and trades industry.

CONTRACT CLEANERS

Innovative products that guarantee the highest level of cleanliness, efficiency and ease of use in building and façade cleaning.

HEALTH SECTOR

Professional and efficient cleaning systems for hospitals that combine impeccable hygiene with cost-effectiveness.

HOTEL AND HOSPITALITY

Professional cleaning systems for sustainable hygiene management in hotels and restaurants.

INDUSTRY

An experienced partner you can rely on for all industrial cleaning tasks.

PUBLIC SERVICE & MUNICIPAL EQUIPMENT

Cleaning machines that enable efficient working in the public service and ensure tip-top cleanliness.

RETAIL

Our solutions for cleanliness and tidiness in shopping centres, retail and wholesale

TRANSPORT & LOGISTICS

Efficient and effective cleaning technologies especially designed for the demanding 27/4 world of transport & logistics.

INNOVATION FROM NORWAY

THE NEW EXPERIENCE MADE TO LAST

AVA of Norway are passionate about their pressure washers and want them to last for as long as possible. Less throwaway, and more focus on maintenance of solid products is simply a good environmental measure.

AVA constantly strive to improve on Environmentally Friendly Design. Together with the Customer's Right to Maintenance, this results in reduced maintenance costs and an extended Consumer Guarantee.

"A manufacturer and a customer working together to take care of the product is a dream team"

AVA of Norway are confident that their customers will appreciate trouble-free maintenance that results in less throwaway. Together, they contribute to reduced costs and a more sustainable development.

SIP Industrial Products have become a flagship supplier of high quality equipment and machinery for a range of different industries for over 50 years old, including: engineering, construction, automotive and agricultural machines marketplaces.

The SIP range is constantly being upgraded and refined to ensure that whatever the task at hand is, SIP have the product to complete the job while performing to the highest possible standard.

cleaning range

SIP Cleaning offers an extensive range of electric, petrol-powered and gearbox-driven pressure washers designed for light and trade use through to heavy-duty machines built for industrial-grade applications.

This selection also includes a superb range of powerful electric floor scrubber dryers, surface-mounted and submersible pumps, delivery and suction hoses, and several valet and vacuum machines, all of which perfectly complement each other.

Electric Cold Water Pressure

The SIP Electric Pressure Washer range is easy-to-use and provides straightforward pressure washing solution for domestic, trade, and professional tasks. The majority of these electric units are Italian-built, and feature innovative solutions and protection for ease-of-use, including a total stop function and durable induction motors. This range offers a combination of mobile and static options.

Vacuum Cleaners & Valeting Machines

The SIP Valet & Vacuum range comprises of a selection of heavy-duty wet and dry vacuum cleaners, all of which feature large collection tanks and a raft of accessories, plus multiple valeting machines designed for the easy cleaning of carpets, fabrics, and upholstery. Features and benefits include shockproof collection tanks, bypass cooling, quick drain plugs, and steel tanks.

Petrol Powered Cold Water Pressure Washers

SIP Petrol Pressure Washers are perfect for any situation where no mains power supply is available, such as on-site or mobile work, agricultural applications, construction, and in automotive markets. These washers are constructed with durable brass-headed pumps and brass fittings for an overall longer service life. A number of these units also implement a folding frame for easy storage.

lifting & automotive range

The SIP Automotive collection is one of SIP's up-and-coming categories, featuring a range of automotive shop and lifting equipment including trolley and bottle jacks, jack stands, shop presses, spring compressors, supports and repair kits, and spill containment and draining solutions.

The SIP Automotive range is perfect for garages, workshops, mobile maintenance, roadside recovery, general repair, and more.

Batteries & Chargers

SIP Battery Chargers are part of the flagship collection of heavy-duty chargers designed for all levels of use, from small cars, through to vans and larger vehicles. All of these units are designed in Switzerland or Italy. Features and benefits across the range include multi-stage charge cycles, dual internal voltages, reverse polarity protection, integrated ammeters and, of course, powerful charging output.

Jacks & Jack Stands

The SIP Bottle/Trolley Jacks and Jack Stand range, has something to suit all domestic and trade vehicles, regardless of their weight or size, and are therefore essential for any garage, workshop, roadside recovery, mobile maintenance, or home use.

Oil Drainage

The SIP Containment & Draining collection has everything needed to ensure safe fluid draining, collection, and transport. This include the SIP oil spill kits - flexible trays with laminated oil-absorbent mats - which are ideal for small plant machinery, tanks, and more, trapping leaks whilst letting water run away. Heavy-duty oil drainers and fuel transfer kits are also available.

Hydraulic Equipment

The SIP Shop Presses are units suitable for both bench and floor spaces in domestic, trade, and professional workshops or garages. All machines have a rugged steel frame and are ideal for the removal or installation of bearings, universal joints, pulleys, wrist pins, and other automotive applications, such as bending, bonding, and straightening. Choose from manual or pneumatic options.

welding & metalwork range

The SIP Welding Range has long been at the forefront of the domestic, trade, and industrial markets. For over 50 years, SIP have been trusted manufacturers and suppliers of quality welding equipment, whether that is ARC, MIG, TIG, or Plasma, you can be sure that SIP has a welder that is suitable for you and the task at hand. Furthermore, the SIP range of welders, inverters, and cutters, is complemented by a huge range of premium quality accessories and consumables, all ready to enhance your welding experience.

The SIP Metalwork Range offers unrivalled machines and technologies that mean SIP have everything you need to work with metal, from start to finish. Choose from a range of pillar drills and drill presses, bench grinders, circular saws, bandsaws, metal finishers, washers and more - all suited for heavy-duty performance.

Welding Machines

The SIP Welding Range has long been at the forefront of the domestic, trade, and industrial markets. For over 50 years, SIP have been trusted manufacturers and suppliers of quality welding equipment, whether that is ARC, MIG, TIG, or Plasma, you can be sure that SIP has a welder that is suitable for you and the task at hand. The SIP range includes a huge variety of premium quality accessories and consumables, all ready to enhance your welding experience.

Pillar Drills

SIP Pillar Drills includes a selection of bench and floor-mounted pillar drills which are suited to drilling both hard and soft metals, as well as various plastics within manufacturing and engineering environments. A range of features includes built-in NVR switches, versatile motor speed adjustment, sturdy cast iron table and base, and soft grip handles. A selection of vices and chuck guards complement them.

Grinding Tools

SIP Bench Grinders are designed for heavy-duty use in a variety of different applications. Split into two separate lines, our bench grinders are suitable for both trade and professional use, with some models boasting wet and dry grinding. Product benefits include heavy-duty robust metal housing, precision-sealed spindle bearings, adjustable tool rests, eye shields, spark arrestors, and wheel guards.

Bandsaws

The SIP Metal Bandsaws are extremely powerful and heavy-duty machines capable of cutting metal reliably, precisely, and efficiently. Choose from a selection of single and three phase machines with varying blade sizes and power. All of these models feature heavy-duty motors, and cast iron construction to ensure optimum performance and durability every time. Ideal for all kinds of use, big and small.

woodworking range

The SIP Woodworking range offers a comprehensive selection of woodworking and woodturning equipment, with everything from bandsaws and circular saws, through to jointers, lathes, morticers, moulders, sanders, stands, and more, plus a range of accessories. Easy-to-operate and excellent value, this woodworking collection will easily satisfy essential tasks for tradesmen, workshops, and other environments.

Furthermore, the SIP Woodworking range is complemented perfectly by a range of auxiliary machines, such as dust collectors, accessories and consumables.

Mitre/Table/Scroll/Band Saws

SIP Wood Bandsaws (10", 12", 14", and 16") are extremely powerful and capable of cutting metal reliably and precisely. Wood Circular Saws are available in standalone table and bench mitre types, meaning choice depending on application, space, and environment, without compromise of power, control, and precision. The Professional Table Saw models offer cast iron tables with extensions, Quick-Lock rip fences, and T-slotted cast iron mitre guides.

Woodlathes

SIP Wood Lathes are manufactured from heavy-duty cast iron, including their beds, headstocks, and tailstocks, and offer powerful variable speed adjustment across the range. Features and benefits in this range include digital speed display readouts, integrated NVR switches, hollow tailstocks for long hole boring, and moving headstocks. A selection of accessories are available.

Morticers

SIP Wood Mortisers are manufactured from heavy-duty cast iron, including their mounts, casings, and components and come in three distinct variations, all of which can double as pillar drills; a bench-mounted version, a larger sliding table variation, and lastly a cabinet-mounted unit. All of these models feature heavy-duty clamps, large chisel capacity, and powerful motors.

Dust Collectors

SIP Dust Collectors are built for effective and efficient dust extraction, filtration, and collection and come in a range of different sizes and strengths. Choose from the popular SIP 50 Litre Dust & Chip Collector, or the larger Vacuum Dust Collectors, available in one, two, and four bag variations. Adaptors and replacement parts make these units suitable for the vast majority of machines.

air compressors & air tools range

The SIP Air range - comprising of SIP Air Compressors, SIP Air Accessories, and SIP Air Tools - has been researched and developed for over 50 years, with their flagship Airmate brand now recognised as one of the widest ranges available in the UK.

SIP compressors are designed for all applications and environments, with several assembled and tested in the UK at SIP HQ in Leicestershire, or manufactured at SIP's site in Italy.

Air Compressors

SIP supply a wide range of compressor types, including: Belt/Direct drive, Super electric/petrol/diesel, screw and silenced compressors.

Impact Wrenches

SIP Air Impact Wrenches are renowned for being reliable, durable, and extremely heavy-duty, offering powerful performance and long service life. Features and benefits in this range include rocking dog mechanisms, twin hammer clutches, positive action triggers, rubber 'soft-grip' handles, and high power-to-weight ratios. Whatever wrench you need, SIP has one to accommodate the task.

Grinding Tools

The SIP Air Grinders & Scalers collection features several models and kits, all of which are extremely robust, reliable, and ready to perform at the highest level. These tools are ideal for cleaning, smoothing welds, and castings, and more, with the 1/4" Kit featuring accompanying grinding stones for precise and accurate working. A powerful needle scaler is available with pistol grip and rubber handle.

Sanding Tools

The SIP Sandblasting range features a selection of heavy-duty sandblasting solutions, primed for prolonged use in various applications in home, trade, and professional environments. The SIP Maxi Blast, for example, is ideal for precision applications in less than accessible areas, whilst the SIP Sandblast Cabinet offers a more general and heavy-duty option.

heating, fans & generators range

SIP Heating features the SIP Fireball range, the flagship range of efficient and effective portable heaters. Choose from a varied range of diesel/paraffin space heaters, propane space heaters, electric fan or electric infrared heaters, and more.

The SIP Ventilation range comprises of various heavy-duty free-standing workshop fans and swivel drum fans as well as portable workshop ventilators and ducting, and air conditioners or dehumidifiers, all of which are designed to ensure a clear, safer working environment, keeping it fresher and removing stale air, odours, and fumes.

Electric/Propane/Paraffin/Diesel Heaters

The SIP Heating features the SIP Fireball range, the flagship range of efficient and effective portable heaters. Choose from a varied range of diesel/paraffin space heaters, propane space heaters, electric fan or electric infrared heaters, and more. The Fireball collection is designed for small garage, workshop, and other trade applications, through to professional-grade and industrial use.

Workshop Fans & Ventilators

The SIP Ventilation range comprises of powerful free-standing workshop and drum fans that are perfect for ventilating factories, garages, agricultural buildings, shops, and more. Keeping air circulating at an ideal level, these fans can provide a fresher working environment and aids the ventilation of odours, smoke, and fumes comfortably. These fans are also perfect for drying applications in a variety of environments.

Generators

The SIP Generators range covers power generation requirements from a small home and trade level, right through to long-range professional and industrial-grade levels, with a variety of generator types available for each. Choose from a range of heavy-duty petrol units, and digital inverters, depending on your application.

Submersible Water Pumps

The SIP Water Pumps range includes a selection of powerful surface-mounted and submersible water pumps, available in electric, petrol, and diesel variations. All SIP surface-mounted pumps are built with a full frame design, and low oil shut-down, for added peace of mind. The submersible models cater for both clean and dirty water, and have integrated float switches protects against running dry.

The Right Brand for Craftsmen.

The development of Unior hand tools constantly follows the requirements of professional and amateur craftsmen all over the world.

Top quality materials and original design solutions are the basis of the extreme practicality, effectiveness and long service life of more than 5,500 hand tools. The availability of tools is ensured by a multi branch distribution network.

With its cold forged products, Unior is an important supplier of tools for the European industry.

Jacobs

CHUCK

Jacobs® chucks, high precision tool holders, arbors, and related accessories have made Jacobs the leading brand of precision tool holding and work holding devices in the world. For more than 100 years, superior grip and accuracy have made Jacobs the industry leader, with Jacobs technology applied to everything from sophisticated CNC machining centers to cordless portable drills.

TYROLIT is one of the world's leading manufacturers of grinding and dressing tools as well as a system provider for the construction industry.

Since 1919, their innovative tools have made an important contribution to the technological development in many industries.

TYROLIT offers tailored grinding solutions for various applications, as well as a comprehensive assortment of standard tools for customers all over the world.

TYROLIT
CUTTING DISCS

★★★
PREMIUM

Tyrolit **PREMIUM** quality line is for professionals using abrasives regularly. It offers the longest lifetime and the highest comfort in the industry.

- ✔ Maximum cutting ability and stock removal rate
- ✔ Above-average lifetime
- ✔ The best work results
- ✔ Maximum economic efficiency
- ✔ Extensive product range – the perfect product for every application
- ✔ Use of innovative technologies and the best raw materials
- ✔ Maximum comfort for the user thanks to low vibration and noise levels

★★
STANDARD

Tyrolit **STANDARD** quality line is for craftsmen looking for the perfect all-rounder. It offers excellent lifetime and comfort while delivering exceptional work

- ✔ Excellent cutting ability and stock removal rate
- ✔ Excellent service life
- ✔ Exceptional work results
- ✔ High level of economic efficiency
- ✔ Large product range – for the most important applications

★
BASIC

Tyrolit **BASIC** quality line is for craftsmen looking for excellent value. It offers good lifetime and comfort while delivering great work results.

- ✔ Good cutting ability and stock removal rate
- ✔ Good service life
- ✔ Good work results

TYROLIT
GRINDING DISCS

2-in-1 rough grinding wheels are ideal for surface and edge grinding on different steel and stainless steel grades, especially in pipeline construction and peripheral grinding.

- ✔ Fast and convenient work with minimal exertion
- ✔ Universal use
- ✔ Comfort Start ensures a comfortable start when grinding and increases the level of working comfort

TYROLIT
FLAP DISCS

Tyrolit **FASTCUT** flap discs are ideal for demanding grinding applications on different steel and stainless steel grades and in some cases on aluminium

Maximum stock removal thanks to FASTCUT technology

Product retains its high abrasiveness over its entire lifetime

Cool grinding thanks to Top Size coating prevents discolouration on the workpiece and thus difficult rework

DEWALT

DeWalt is a market-leading manufacturer of premium power tools, accessories and anchors and fixings that provides a fully integrated system solution for various applications. DeWalt tools offer unparalleled performance, with durable construction for a professional finish and a generous 3 year guarantee on most tools

Workshop Equipment

From Wheel Service to Battery Care, Draper Tools can help supply your workshop with a diverse selection of quality tools to get the job done.

- Wheel Service
- Lifting & Support
- Presses & Pullers
- Workshop Pumps
- Draining & Parts
- Cleaning
- Lubrication
- Battery Care

Elora

All Elora products are hot dropped forged incorporating strict production control resulting in top quality tools. This means that in the Elora factory, wrenches, ratchets, socket parts and many other products are forged under Elora's control to its own exacting high standards. The major proportion of the Elora range is made from one-piece forgings. Hardening takes place in a continuous automatic hardening furnace followed by tempering in oil.

- Socket Sets
- Socketry
- Spanners
- Stainless Steel Hand Tools
- General Hand Tools

Draper Tools prides itself on the range, quality and value of its hand tools. You'll find tools suitable for professional trades and household DIY usage within this selection of tools. From hammers, to screwdrivers, knives, saws, wrenches, multi-tools and so much more. Whether painting and decorating, tackling the DIY, finishing a professional woodworking project or working on a construction site, you will find the right hand tool, for all jobs.

- Pliers & Cutters

Starrett®

For more than 130 years, manufacturers, builders and craftsmen worldwide have trusted **Starrett** quality precision tools and saws to ensure the consistent quality of their work.

Users know that the Starrett name on a saw blade, hand tool or measuring tool ensures exceptional quality, innovative products and expert technical assistance.

With strict quality control, state-of-the-art equipment and an ongoing commitment to producing superior tools, the thousands of products in today's Starrett line continue to be the most accurate, robust and durable tools available.

HOLE SAWS

The hold saw line includes the Fast Cut and Deep Cut bi-metal saws, and application-specific hole saws engineered specifically for certain materials, power tools and jobs. A full line of accessories, including Quick-Hitch™ arbors, pilot drills and protective cowls, enables you to optimise each job with safe, cost

HACKSAWS

Hacksaw Safe-Flex® and Grey-Flex® blades and frames, Redstripe® power hack blades, and PVC saws to assist you with all of your hand sawing needs

JIG SAWS

Starrett Unified Shank® jig saws are developed for wood, metal and multi-purpose cutting. The Starrett bi-metal unique® saw technology provides saws with 170% greater resistance to breakage, cut faster and last longer than other saws. The Dual Cut® blades are an exclusive saw design to provide burr-free cutting on both sides of the material

RECIPROCATING SAWS

General purpose reciprocating blades provide a comprehensive set of sawing solutions to professional trades people and do-it-yourselfers. The range includes pallet dismantling blades, King Cut® rescue and demolition and multi-purpose blades

PORTABLE BAND SAWS

Starrett offer blades for these convenient power tools. Univerz™ are ready to go to work in convenient lengths to fit popular portable machines

MEASURING TAPES

There is a variety of measuring tapes and Measure Stix™ available, in a wide range of styles and sizes. Graduations are available in English and Metric to meet virtually every requirement for accurate tape

UTILITY KNIVES

With safety and innovation at the forefront, Starrett offers advanced solutions for a safe utility knife and replacement blade dispensing solutions

LEVELS

A variety of application specific tools which prevail where standard levels fall short

RULES AND SQUARES

Starrett rules and squares are made from fine quality materials and produced to the highest precision standards, making them the most accurate and readable rules on the market. Offered in a practical variety of styles to suit the needs of the individual, whether it be a toolmaker, mechanic, carpenter, or a do-it-yourself homeowner.

SLIDE CALIPERS

Starrett calipers are light, comfortable, easy-to-use, and constructed with features that have made Starrett slide calipers the machinist's first choice for many years

Wera tools are unlike other tool manufacturers. Their products turn the familiar into the extraordinary. They have developed superior hand tools to make your life simpler, safer and full of joy.

Nick-named the 'Tool Rebels' because of their ability to develop rebellious solutions to problems, often thought of as unsolvable. As a hand tool manufacturer, Wera understand there are other screwdriver sets available on the market, but they are never content with today's standards and do not believe that these tools have reached their ultimate stage of development. It's this same defiant nature that drives the brand with their future innovations.

Since its inception, the **Osborn** brand has always been synonymous with quality. Tool manufacturing has changed a bit since the beginning, but the latest multi-axis CNC grinding machines and in-house coating plant will ensure that quality will be at the forefront of Osborn products, long into the future.
